

Enterprise Architecture Management and Reference Models **Study Project Kickoff**

Kerstin Andree

Technical University of Munich

TUM School CIT

Heilbronn, 21.05.2026

Case Study - Overview

*“A **case study** is an in-depth, detailed examination of a particular case (or cases) within a real-world context.” - Wikipedia*

- You act as an enterprise architecture consultant
 - A (case) enterprise has hired you to examine its architecture in-depth
 - Having different materials, you
 - have to deal with different types of (lacking) information
 - will represent and analyze the architecture using the ArchiMate Framework
- There are two cases
 - C1: ArchiTrain
 - C2: ArchiHotel

Organization

- Examination (max. 10 exam points)
 - 5 points for the final presentation (content/slides/style)
 - 5 points for the architecture models
 - Team examination
- Important dates and deadlines
 - Registration until 28.05.2026 via Moodle (opens on 21.05. at noon)
 - Up to 5-6 students per team
 - Open consultation (Q&A) on Wednesday 10.06.2026
 - You can book a 10-minute slot via Moodle if needed
 - Prepare the appointment
 - How to present session on Wednesday, 17.06.2026 (tutorial slot)
 - Submission Deadline (Models + Slides): 02.07.2026 at 23:59 via Moodle
 - **Mandatory** on-site date: Presentations of the results takes place on Friday, 03.07., Monday, 06.07. and Tuesday, 07.07. between 13.00 and 17.30 (Slots are bookable via Moodle when registering for the project)

Organization

- If you do not register for the study project, you have to solve a modeling task in the final exam on paper (within 90 minutes)
- Those students who registered for the case study are not allowed to solve one exam task but still have the full 90 minutes
- **Important notes**
 - Registrations for the study project must be submitted by the deadline
 - Final presentations are mandatory for all team members!
 - **Acceptable reasons** to not be able to attend are:
 - Sickness: submit a medical certificate on the presentation day to Kerstin Andree via email
 - Another exam: please inform us by 31.05.2026 via email to Kerstin Andree if an exam is planned for your presentation day, including the exam name and the responsible professor
 - Work or private plans are not accepted

Your Tasks (I/II)

- Your team is working on one case study (either ArchiTrain or ArchiHotel) with a specific focus area
- For your case study, you will find all the material with information related to your case online (also linked on Moodle)
 - C1 ArchiTrain: <https://architrain-eam.web.app/>
 - C2 ArchiHotel: <https://archihotel-eam.web.app/>
- Read the material thoroughly!
- Based on the given material, create the following enterprise architecture models using ArchiMate
 - An **abstracted model** showing structure and behavior elements of the complete enterprise architecture without details
 - A **detailed model** showing your focus area in depth

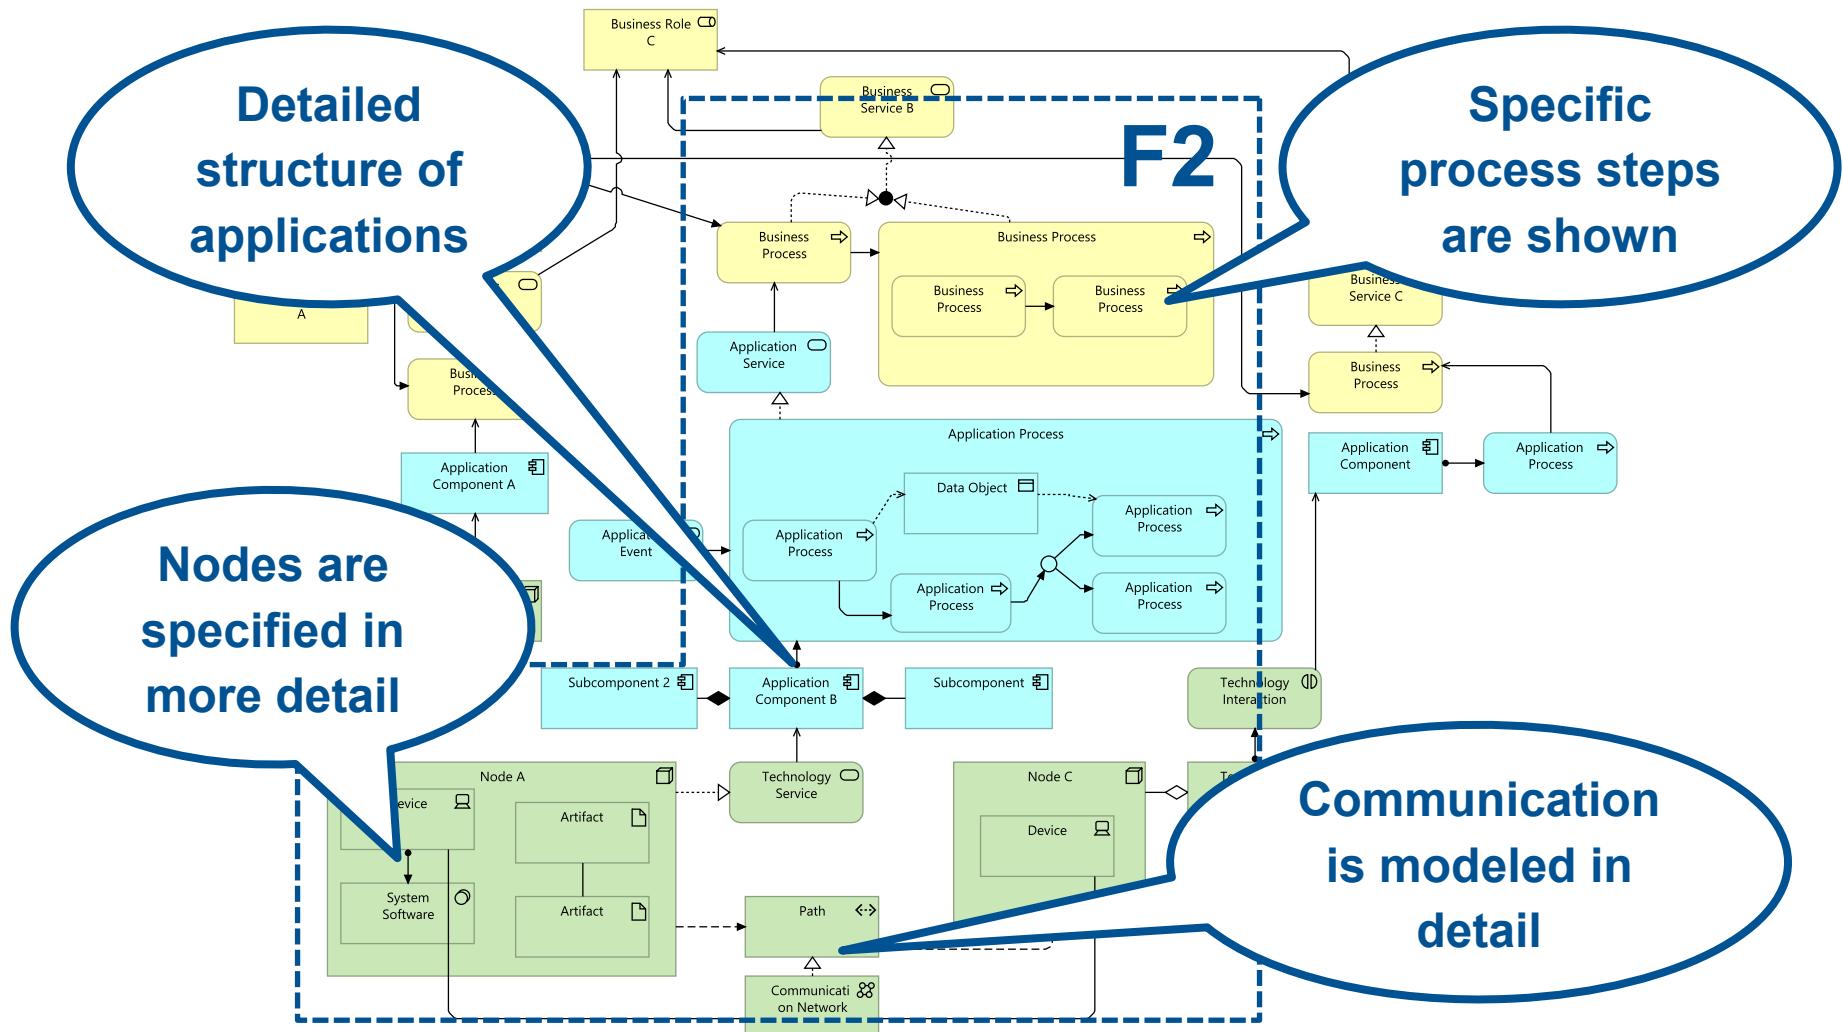

Your Tasks (II/II)

- Join the consultation session and how-to-present session
- Prepare the presentation
- Submit a .rar or .zip file containing the following files:
 - one .archimate file that contains your abstract model and the detailed model as different views
 - one .pdf file containing the abstract model
 - one .pdf file containing the detailed model
 - one .pdf file and one .pptx file containing your presentation slides
- Naming:
 - .zip (or .rar) and .pptx file should be named after your group, e.g., C2F1G3
 - Views included in the .archimate file should be named properly
- Deadline: **02.07.2026 at 23:59**

- Abstracted View: General processes, components, ...
- Only basic elements, no details

Modeling: Detailed Model (Focus Area F2)

Abstract vs. Detailed Model

Abstract Model	Detailed Model
• General Services • Application Components on an abstract level (no details about structure) • Abstract from behavior (e.g., one general process instead of specific steps) • Abstract from devices and summarize technology infrastructure with nodes • Communication on a very generic level • ...	• All details mentioned in the text that are related to your focus area • Concrete process steps • Show how applications and nodes are structures, the elements they are consisting of • Communication has to be modeled • Details

→ Level of abstraction is your modeling decision. Find the balance!

Consultation Sessions: 10.06.2026

- Optional meeting!
- Your team can book a consultation slot (10 minutes) via Moodle
- If you book an appointment, come prepared:
 - Prepare a short summary (1 min) of your current status: On which use case are you working? What is your focus area?
 - Prepare concrete questions about the provided material and/or modeling: For each question, have the respective text paragraph or the model snippet ready to explain your question (e.g., via slides, note overview, ...)
 - Assign roles for session lead and note taker to get the best out of the 10 minutes!
- General notes
 - Arrive on time
 - Consultation session will take place in B.0.23 from 9:00 to 12:00

Presentation: 03.07.26, 06.07.26 & 07.07.2026

- 10-12 minutes for presenting in case of a 5 person-team,
12-15 minutes for presenting in case of a 6 person team
- Every team member has to actively present
- 3-5 minutes discussion (we will ask you questions)
- Presentation dates:
 - Days: Fri 03.07.26, Mo 06.07.26 & Tue 07.07.2026 in room C.0.44
 - Time: each day between 13:00 and 17:30
 - Your team has to attend only your assigned presentation slot
 - You book your presentation slot when registering for the project
- How to present session on 17.06.2026
 - We will show you ideas on how to present an EA model
 - Guidelines on presentation style and slides
- Presentation is graded (content, structure, style): maximum 5/10 points

Registration and Selection of Presentation Slot

	Friday, 03.07.2026	Monday, 06.07.2026	Tuesday, 07.07.2026
13:00	C1F1G1	C1F3G1	C2F2G1
13:20	C1F1G2	C1F3G2	C2F2G2
13:40	C1F1G3	C1F3G3	C2F2G3
14:00	Break (10 minutes)		
14:10	C1F1G4	C1F3G4	C2F2G4
14:30	C1F1G5	C1F3G5	C2F2G5
14:50	C1F1G6	C1F3G6	C2F2G6
15:10	Break (10 minutes)		
15:20	C1F2G1	C2F1G1	C2F3G1
15:40	C1F2G2	C2F1G2	C2F3G2
16:00	C1F2G3	C2F1G3	C2F3G3
16:20	Break (10 minutes)		
16:30	C1F2G4	C2F1G4	C2F3G4
16:50	C1F2G5	C2F1G5	C2F3G5
17:10	C1F2G6	C2F1G6	C2F3G6

Presentation: 03.07.26, 06.07.26 & 07.07.2026

- General Introduction (~3 min)
 - Briefly introduce your use case
 - Show and explain your abstract EA model
 - What are the key elements that characterize this architecture?
 - Stakeholders, main services, ...
- Team Focus Area (~7 min)
 - Explain your focus area of the case on all layers by showing your detailed model
- Reflection Questions (~2 min)
 - How does this model provide value to the business?
 - What are the limitations of your model?
 - What information for a truly holistic model is missing in the material?
 - What challenges did you experience while modeling?

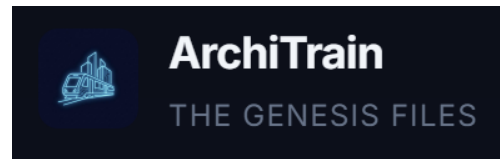

Presentation: 03.07.26, 06.07.26 & 07.07.2026

- Make sure that you prepare a .pptx file containing your slides and animations
- Presentation day:
 - You **do not** have to **bring your own computer** (no need to test technical setup)
 - To present your architecture models, you will **use our laptop to share your slides**, and your presentation will be already ready to be presented
 - Make sure to submit your final version with the .rar or .zip file you submit by 02.07.2026 because you cannot make any changes anymore!
 - **Arrive at least 5 minutes before your presentation starts**, we will not wait for you due to a tight schedule!

How to work in a team

- Different approaches are possible
 - Split up in sub-teams and work on different aspects
 - One team per layer
 - One team per service (modeling on all layers)
 - Make sure you meet all together to do the alignment
 - Check for merge conflicts
 - Create the models + presentation all together
- Regular meetings within the team are highly recommended!
- Also plan meetings to prepare and practice for the presentation
- Everyone has to present, and we will ask questions to every team member → make sure that everyone participates in the teamwork!
- If there are severe problems, do not hesitate to reach out to us!

C1: ArchiTrain

C1: ArchiTrain

- Scenario: Help the ArchiTrain enterprise. They asked you to create an architecture model of their architecture to get more transparency.
- Provided material:
 - Sequence Diagram
 - Interview with Dr. Marcus Chen, Chief System Architect
 - Incident Report
 - ...
- Focus Areas:
 - Focus 1: Ticketing & Train Journey Management
 - Focus 2: Train Localization and Scheduling
 - Focus 3: Malfunction and Disruption Management

C2: ArchiHotel

C2: ArchiHotel

- Scenario: ArchiHotel has hired you as enterprise architects to create an architecture model of the hotel and its services to manage its complexity.
- Provided material:
 - Booking platform and dashboard snippet
 - Detailed descriptions of services and infrastructure
 - Reports from hotel staff members
- Focus areas:
 - Focus 1: Reservation Handling & Check-In
 - Focus 2: Room Access & Daily Briefing
 - Focus 3: Special Request Handling, Laundry & Transfer Service

Next steps

In the team:

- Find together as a team and register!
- Contact your team members and set up a first meeting
- Discuss how you want to work on this project
- Assign tasks
- Set up the next meeting

Individually:

- Read the material!
- Write down all the questions you have
- Discuss the questions within the team
